WORK HARDER FOR LONGER

EXCAVATOR OWNER IS HAPPY WITH HIS OIL CONSUMPTION

THE CHALLENGE

Dean from Deano's Diggers was finding himself using excessive oil with his previous suppliers and he was spending more money than needed. He also had to top up more frequently than expected. Dean felt that the oils were not lasting the recommended time as well as leaving his machine in quite a mess.

THE TERRAPPE SOLUTION

Kevin from Terrappe Group suggested that Dean try the Texxon Hydraulic oil. This has been developed specifically for the earthmoving, forestry and transport industry to provide an alternate that will keep your machines working harder for longer. This oil is developed using the latest additives which maintains a higher viscosity and reduced foaming.

"I am very happy with how the Texxon oil has performed in my machines. After using it for the last 3 years I have reduced the quantity of oil used and the overall running cost.. My machine is now a lot cleaner with less oil leaks and increased performance."

Dean (Deano's Diggers)
