PRODUCT CASE STUDY

ISSUE 23 • SEPTEMBER 2017

Terrappe GROUP
WORK HARDER FOR LONGER

EXCAVATOR OWNER BACK ON TRACK

THE CHALLENGE

Scott from S & N Withers owns a Kubota excavator. He was finding that the previous pads that he was using on his Machine didn't give the hours he was expecting. He found that they were not lasting due to rubber showing excessive wear.

THE TERRAPPE SOLUTION

Jason from Terrappe Group suggested that he try the AUSTRACK RUBBER PADS as they have the optimum combination of natural and synthetic rubber. This along with the superior vulcanization process which creates a stronger rubber to metal bond would give the rubber pads an extended wear life and a reduction in cost per hour.

"I'm really happy with the rubber pads they are such a good quality product with great results. I'm getting much longer wear and hours"

Scott (S&N Withers)
